OPTIONAL EYECAM EXTREME BASE STATION & EYECAM EYEWEAR

LOOK AND FEEL LIKE A PRO WITH THESE EYECAM EXTREME ACCESSORIES!

Imagine the possibilities of wireless freedom.

The Eyecam Extreme RX Base Station Case is a purpose-built, military grade indestructible ABS plastic case. It comes ready to mount the Eyecam Extreme's receiver, receiver power battery, and a video storage device. We recommend a MiniDV-based recorder with LCD screen. It also has a collapsible, pivoting patch antenna mount that holds

the patch antenna pointed in your direction of choice. Inner case dimensions, on the Eyecam Extreme RX Base Station Case, are 9.4" by 7.2" by 4.1".

The video from the Eyecam Extreme 460 lines of resolution CCD Video Camera approaches broadcast quality. While, VHS tape records only 240 lines, the MiniDV is barely capable of storing all of the information with its 500 lines. For this reason, MiniDV is the recommended storage medium.

This item includes the case (readied for Eyecam Extreme storage) and a pole mount for the patch antenna. Also optional are the Eyecam Extreme Eyewear Video Glasses.
