

THUNDER ⚡ POWER RC

FOR IMMEDIATE RELEASE

The All-New TP1430C High-Power Multi-Chemistry Charger/Discharger/Cycler/Balancer System

Thunder Power RC introduces the TP1430C multi-function charger, discharger, cycler and balancer system boasting 1000 watts of charging power for LiPo, Lilon, LiFe, NiCd, NiMH and Pb batteries.

LAS VEGAS, NV. October 26, 2011 – The all-new TP1430C is our most powerful multi-chemistry charger, discharger, cycler and balancer system ever released from Thunder Power RC. With up to 1000 watts of total charging power, the TP1430C can charge, discharge and cycle a wide variety of 1-14S LiPo, Lilon and LiFe (A123) batteries, as well as 1-40 cell NiCd and NiMH along with 6-48V Pb (lead-acid) batteries. The built-in 2-14S LiPo/Lilon/LiFe (A123) cell balancer and included balance connector adapter board are readily compatible with all Thunder Power balance connectors and the JST-XH balance connectors found on most other batteries.

Boasting the same compact design and technology as the TP820CD, the TP1430C is capable of charging at rates up to 30 amps offering the ability to charge many of the latest-generation LiPo batteries at ultra-fast rates up to 9C and beyond. Additional features include built-in data monitoring and viewing on the large class-leading and easy-to-read 48-character blue backlit LCD screen, internal resistance measurement and an advanced Storage Mode function to automatically charge or discharge LiPo/ Lilon/LiFe (A123) batteries as needed. Other great features also include dual computer-controlled cooling fans and temperature protection, an attractive and extremely durable aluminum case, plus the ability to install future firmware updates available for free download from www.ThunderPowerRC.com using a standard mini USB cable. Best of all these incredible features are all available at a value that's hard to beat while being fully supported and backed by Thunder Power RC's industry-leading 2-year warranty.

The capable and powerful TP1430CD is now available for pre-order with an ETA of late December 2011.

About Thunder Power RC

Since 2003, Thunder Power RC has been the world-leader in the advancement of Lithium Polymer (LiPo) battery power and charging solutions for a wide variety of RC, UAV/UAS and other applications. Continuing to set industry-leading standards in performance and reliability is why more pilots, drivers and professionals world-wide choose Thunder Power RC LiPo batteries over any other brand.

Thunder Power – # 1 in Performance and Reliability
